

Hello User,

Today the Novem Example Index is up by 4.5% driven by strong performance across the board, particularly in technology stocks (**AAPL +9%, TSM +9%, ASML +14%**) and their consumer proxies (**AMZN +12%, BABA +7.5%, TSLA +7%**).

On the negative side, Brazil it's continuing it's fall and is down over 6% on the day detracting 20bps from the overall index performance.

Overall the 4th quarter feels better with November continuing the trend of clawing back some of the underperformance so far in 2022.

The above chart shows the Year To Date performance for the Novem Example Index (NEI) as well as the performance of the key underlying regions. Regional performance show the total performance of the region and not it's contribution to the aggregate NEI.

Taiwan	41.2	8.7%	12.7%	14.3%	3.9%	-39.6%

The above table shows the performance breakdown of the Novem Example Index by return periods and geography.

Returns are structured so that each country show the weighted contribution of their underlying stocks, with sub regions showing the weighted contribution of their countries and so on. The world performance is identical to the aggregate performance of the Novem Example Index.

Data from nasdaq and yahoo finance, calculations by novem, all numbers as of 10th of November 2022.

## Disclaimer

---

*The Novem Example Index (NEI) is an attempt by novem at creating a realistically looking dataset for our visualisation offering. It's not trying to be an accurate representation of a fund or an index. The calculations are inaccurate and does not attempt to preserve history across runs or address errors in a consistent way. Neither trade volume nor liquidity are considered.*

*Please do not use the information or example code beyond its intended scope.*

*Index Construction: The novem example index constituents are defined as the 500 largest companies from the Nasdaq stock screener. The YTD returns are calculated from Yahoo finance price history and the returns weighted by historic price adjusted market cap.*
